

Figure 1 displays 12 histograms showing the distribution of the number of non-zero elements in the rows of the matrix  $A_k$  for  $k$  from 0 to 11. The histograms are arranged in a 3x4 grid. The x-axis for all plots is 'Number of non-zero elements' ranging from 0 to 100. The y-axis is 'Frequency' ranging from 0 to 10. The distributions are roughly bell-shaped and centered around 50-60 non-zero elements.
